

# The Chicken or the Egg Dilemma

AND YET THE QUESTION REMAINED:  
"WHO CAME FIRST?"

By Glen Simmons-Staves , GSAP Special Correspondent

May 2023

# Which Came First ?

- 1) The Chicken (Hen)
- 2) The egg
- 3) Neither, it's a cycle that's been going on forever
- 4) Don't know or don't care

**Why do we need to know ?**

Where do we come from ?

The origin of life

# What have others said ?

- Aristotle – The chicken  
(Prime mover)
- Stephen Hawking - The egg
- McCain - Obama debate – The  
chicken

# Option 1: The Egg

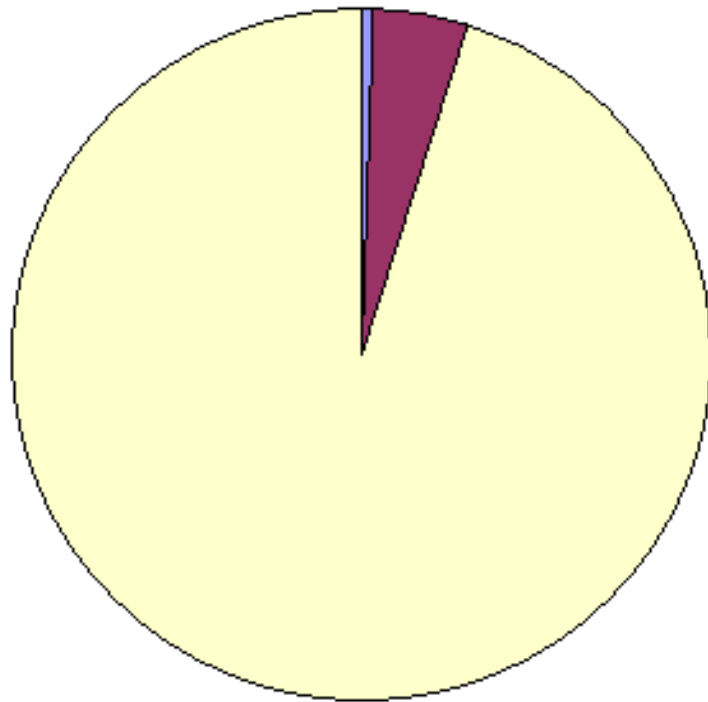

- Where did the first egg come from?
- Who raised this chicken?

# Option 2: It's a cycle that's been going on forever

- An elegant answer that tries to avoid the paradox
- Over what period do these cycles go?
- If infinite cycles, is there evidence of a previous cycle?
- What about the law of entropy?
  - Chaos is increasing over time
- Mutation is never positive. Imagine changing random memory locations in a computer operating system e.g. change an instruction from adding to subtracting → disaster / crash

# What do we really know ?

All Knowledge there is

- What you know here
- What the human race collectively knows
- What we don't know

Not to Scale

# Evolution versus Design

- Who initiated big bang?
- From non-intelligence to intelligence
- The chicken or the egg?
- Evolution due to mutations
- Designer always existed
- Perfect species DNA degrades over time
- Adult chicken created
- Adaptation to life's challenges

# Option 3: The Chicken (Hen + Rooster)

- Solves the problem of rearing the 1st chicken
- Where did the first hen come from?
- Must have come from a being(s) outside time and space
- A supreme being who was not created but always existed (Not an alien)
- **God**

**Note:** It turns out there is an enzyme, only found in the hen's ovaries, needed to produce the egg

# Is there evidence of a God(s)?

- Number 1 best seller is still ....
- The Bible
- 66 Books
- Over 40 authors who were scattered over the world and written over several thousand years
- Contains accounts that are consistent with each other
- Archaeological evidence has not been disproved

# Conclusion: So What !!!

- Don't sit on the fence
- Decide what you believe
- The Chicken or the Egg
- What are the implications ?
- Is there or Who is the designer & creator of them ?

**That's all folks**
